FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Honorable Richard A. Gephardt
U.S. House Of Representatives
Washington, DC 20515

Dear Representative:

I have spent many years of enjoyment constructing and operating radio controlled model airplanes. I belong to several local clubs whose members share a common interest. Between the building tools, airplane kits, radios, engines, finishing materials, all add up to a large investment. Joy abounds by the camaraderie that develops between father and son or daughter, grandfather and grandchildren by building and operating their model together. Kids sharing the hobby with an adult, learn how to use their hands and minds. Kids in R/C hobby aren't gang members!

I am very concerned about what has been proposed by the Federal Communications Commission. The proceeding is PR Docket 92-235. If adopted the rule will greatly reduce the usability of frequencies currently assigned for radio control model usage. It will increase the risk of accidents and attendant liability.

Our radio controlled frequencies are in the 72/76 MHz band. This band is primarily used for private land mobile dispatch operations. Presently our radio-control frequencies in this band are far enough apart from the land mobile frequencies that we co-exist by not interfering with one another.

The Notice Of Proposed Rule Making (NOPRM) in PR Docket 92-235 replaces part 90 of the rules with a new Part 88. Part 90 allows safe use of radio controlled aircraft and surface models by keeping 10 Khz spacing between fixed commercial users and frequencies used by R/C enthusiast. The new Part 88 will allow mobile users on frequencies within 2.5 Khz of frequencies available to us, eradicating safe use of at least 31 of 50 channels on the 72 Mhz band for R/C aircraft and, 10 of 30 frequencies on the 75 Mhz band for R/C cars and boats.

In supervised R/C model operation safety is paramount, for the spectators, operators, and property. Coordination of radio frequencies used simultaneously dictates our safety control and are strictly observed. Reduction of frequencies

I think its unfair for the FCC to consider expanding the operations of land mobile radio users at the expense of the radio control modelers. The FCC must think we are not as worthy of radio frequency usage as the user of business radio. As individuals our power is how we vote, as an industry we contribute a sizable income to our nation. None of what we do contributes to the sales of drugs or the delinquency of children. The mobile communications industry can't say that. Is this going to be another scenario of the big guy and his paid lobbyist wins again? I hope not because I have faith in you that's why I'm appealing to you for your help

Please help me continue the safe enjoyment of my pastime by not allowing the FCC to carry out its proposal PR Docket 92-235 for the 72/76 Mhz band. We need your help urgently because the FCC has a deadline of February 26, 1993 after which it may become more difficult to avoid halting these proposals from going into effect.

Cordially,

Hon. Richard A. Gephardt
U.S. House of Representatives
Washington, DC 20515

Dear Rep. Gephardt:

I am writing to request your assistance in maintaining a safe separation between frequencies used for model Remote Control planes and cars and those used by mobile land dispatch operations.

Currently there exists a 10Khz separation in the two sets of frequencies. This is proposed to be reduced to an unsafe separation of only 2.5 KHz, a reduction in the safety cushion of 75%!! Our concern as model operators has always been the safety of our own friends and family, as well as the public who often come to watch our flights.

The "Notice of Proposed Rule Making (NOPRM)" in PR Docket 92-235 proposes to replace the current safe standard (Part 90), with the narrower, riskier standard of (Part 88). In addition to significantly reducing the safety margin, it also effectively eliminates for model use 31 of the current 50 channels in the 72 Mhz band, and 10 of the current 30 channels in the 75 Mhz band.

I think it is grossly unfair to allow a public recreational use of our airwaves to be stolen for the personal, private gain of the mobile land dispatch operators.

We have no hope of matching their mercenary lobbyists' efforts. Therefore I am calling on you, as our sworn representative, to help us in this matter. I sincerely hope that we can count on you to place wholesome family values and recreation ahead of crass commercialism. Your timely response will be greatly appreciated, as the FCC deadline of February 26, 1993 is rapidly approaching.

Please advise me of your views on this matter, and what actions you or your staff undertake on our behalf.

Sincerely,

Paul B. Strong

Is this going to be another scenario of the big guy and his paid lobbyist wins again? I hope not because I have faith in you that's why I'm appealing to you for your help

Please help me continue the safe enjoyment of my pastime by not allowing the FCC to carry out its proposal PR Docket 92-235 for the 72/76 Mhz band. We need your help urgently because the FCC has a deadline of February 26, 1993 after which it may become more difficult to avoid halting these proposals from going into effect.

Cordially,

MAR - 8 1993

FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

JAN 20 1993

January 20, 1993

Honorable Richard A. Gephardt
U.S. House Of Representatives
Washington, DC 20515

Dear Representative:

I have spent many years of enjoyment constructing and operating radio controlled model airplanes. I belong to several local clubs whose members share a common interest. Between the building tools, airplane kits, radios, engines, finishing materials, all add up to a large investment. Joy abounds by the camaraderie that develops between father and son or daughter, grandfather and grandchildren by building and operating their model together. Kids sharing the hobby with an adult, learn how to use their hands and minds. Kids in R/C hobby aren't gang members!

I am very concerned about what has been proposed by the Federal Communications Commission. The proceeding is PR Docket 92-235. If adopted the rule will greatly reduce the usability of frequencies currently assigned for radio control model usage. It will increase the risk of accidents and attendant liability.

Our radio controlled frequencies are in the 72/76 MHz band. This band is primarily used for private land mobile dispatch operations. Presently our radio-control frequencies in this band are far enough apart from the land mobile frequencies that we co-exist by not interfering with one another.

The Notice Of Proposed Rule Making (NOPRM) in PR Docket 92-235 replaces part 90 of the rules with a new Part 88. Part 90 allows safe use of radio controlled aircraft and surface models by keeping 10 Khz spacing between fixed commercial users and frequencies used by R/C enthusiast. The new Part 88 will allow mobile users on frequencies within 2.5 Khz of frequencies available to us, eradicating safe use of at least 31 of 50 channels on the 72 Mhz band for R/C aircraft and, 10 of 30 frequencies on the 75 Mhz band for R/C cars and boats.

In supervised R/C model operation safety is paramount, for the spectators, operators, and property. Coordination of radio frequencies used simultaneously dictates our safety control and are strictly observed. Reduction of frequencies increases chances of accidents due to adjacent channel interference.

I think its unfair for the FCC to consider expanding the operations of land mobile radio users at the expense of the radio control modelers. The FCC must think we are not as worthy of radio frequency usage as the user of business radio. As individuals our power is how we vote, as an industry we contribute a sizable income to our nation. None of what we do contributes to the sales of drugs or the delinquency of children. The mobile communications industry can't say that. Is this going to be another scenario of the big guy and his paid lobbyist wins again? I hope not because I have faith in you that's why I'm appealing to you for your help
